Material Handling Made Easy

Dust collection system work on the basic formula of Capture, Convey & Collect.

SPECIFICATIONS YOU NEED TO KNOW :

Volume + Velocity = Visibility + Safety

Correct + Pressure = Minimum blockage

Fan Design = Max efficiency = Longevity

Filter ratio = Long Life

Higher Filter area = Lower velocity = Less maintenance

Variable speed drive = Lower energy costs.

OUR STD AIR PERMIABILITY RATIO - 1:212

Depending on material type, We provide the different type of filter media. like for Abrasive material we provide PTFE Coated.

ABOUT US

Filtration is through high efficiency cartridge type filters.

PRO-QUIP uses and intellegent pulse controller which measures the resistance that the cartridges are producing and only pulses when it is needed.

We deliver tailor-made solutions with holistic approach to every customer in order to sort-out their Material Handling Problems.
